### INTRODUCTION

Congratulations on your purchase and welcome to Woodland Mills! This manual gives you the necessary information about your Woodlander<sup>™</sup> sawmill trailer so you will be able to use it properly. The entire manual must be read and understood before using the trailer. If any questions should arise that are not covered by this manual, please contact Woodland Mills, Inc.

Woodla	e take a moment to record the following information about your ander™ sawmill trailer. If you need to call for assistance, please be to provide your model and agricl numbers. This information will allow
	to provide your model and serial numbers. This information will allow help you more quickly when you call.
MODE	LNUMBER
SERIA	AL NUMBER
DATE	OF PURCHASE

The Woodlander<sup>™</sup> sawmill trailer is compatible with HM126, HM130 & HM130MAX sawmill and track systems for milling logs while the trailer is stationary and firmly supported on the ground. It is not intended to carry any additional weight or be used as a utility trailer.

The Woodlander<sup>™</sup> sawmill trailer is designed for certain applications only. We strongly recommend the trailer not be modified and/or used for any application other than that for which it was designed. If you have any questions relative to a particular application, DO NOT use the trailer until you have first contacted Woodland Mills to determine if it can or should be performed using the product.

For technical questions and replacement parts, please contact Woodland Mills, Inc.

## **\*\*SAVE THESE INSTRUCTIONS\*\***

## **GENERAL SAFETY RULES**

# WARNING!

Read and understand all instructions. Failure to follow all instructions listed below may result serious injury.

## WARNING!

The warnings, cautions, and instructions discussed in this instruction manual cannot cover all possible conditions or situations that could occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product but must be supplied by the operator.

## **INSPECTION/MAINTENANCE**

- Check the tires before all trips. Make sure they are inflated to the pressure shown on the tire.
- Grease the axle bearings every 3 months or 1000 miles (1600 km), whichever comes first.
- Check the tow hitch ball coupler. Make sure it is not damaged.
- Check the wheel lug nuts before all trips. Make sure they are torqued properly.
- Check the lights. Make sure all the lights work properly. Replace any lights that do not work.
- Inspect trailer before all trips for any damaged or loose parts.

## **TECHNICAL SPECIFICATIONS**

Item	Specification
Trailer Axle	Independent Torsion Axle Design
Trailer Wheels	5 Bolts @ 4.5" (114 mm) & 5.30-12 DOT Approved Tires
Tire Pressure	Refer to Tire
Wheel Nut Torque	80 ft•lb / 110 N•m
Trailer Ball Coupler	2" / 50 mm
Trailer Lights	LED Light Kit (stop, turn, tail, side markers, and license plate light)
Finish	Powder Coat Paint / Galvanized Steel
Fenders	Removable
Safety	Locking pins and safety straps to secure sawhead while travelling

#### **BOLT TORQUE SPECIFICATIONS**

Bolt (Thread Size)	Torque
M5	78 in•lb / 9 N•m
M6	133 in•lb / 15 N•m
M8	333 in•lb / 38 N•m
M10	53 ft•lb / 72 N•m
M12	93 ft•lb / 126 N•m

# TRAILER ASSEMBLY

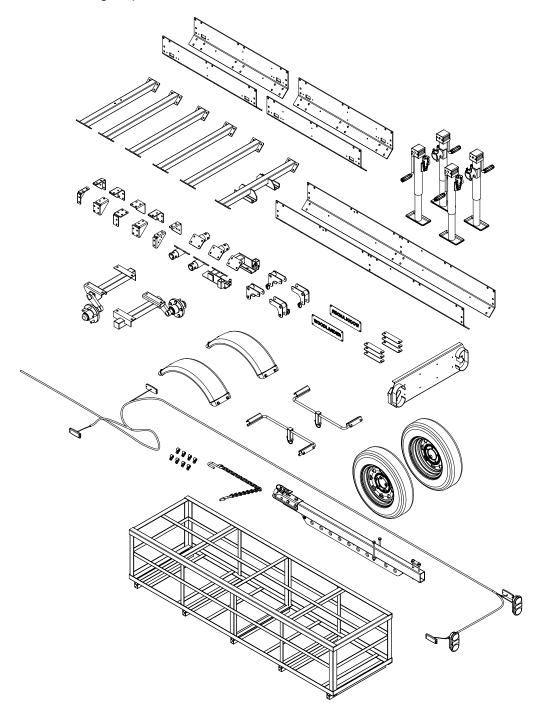

#### 1. TOOLS REQUIRED

ΤοοΙ	Specification
Phillips Head Screwdriver	No. 3
Wrench/Socket	8 mm
Wrench/Socket	9 mm
Wrench/Socket	10 mm
Wrench/Socket	13 mm
Wrench/Socket	14 mm
Wrench/Socket	15 mm
Wrench/Socket	18 mm
Adjustable Wrench	Variable
Torque Wrench	Capable of 93 ft•lb (126 N•m)
Drill	Corded or cordless

#### 2. UNPACKING

Remove all the parts from the steel crate. Set the crate aside as it will be used as a support for several of the following steps.

#### 3. GUSSETS

Using the hardware listed below, assemble the gussets to the track as shown on the next page.

Ensure the track width is set correctly (see track widths on next page), and measure diagonally to check for squareness. Torque all bolts per the table in section, **<u>BOLT TORQUE</u> <u>SPECIFICATIONS</u>**.

24x	M10 X 30 mm Flanged Hex Bolt		2x	Middle Bunk	A CONTRACT OF A
8x	M10 X 40 mm Flanged Hex Bolt		2x	Joining Plate	
32x	M10 Flanged Lock Nut		4x	End Gusset	
2x	End Bunk		6x	Joining Gusset	00000
1x	Joining Bunk	A CONTRACTOR	4x	Track Rail	

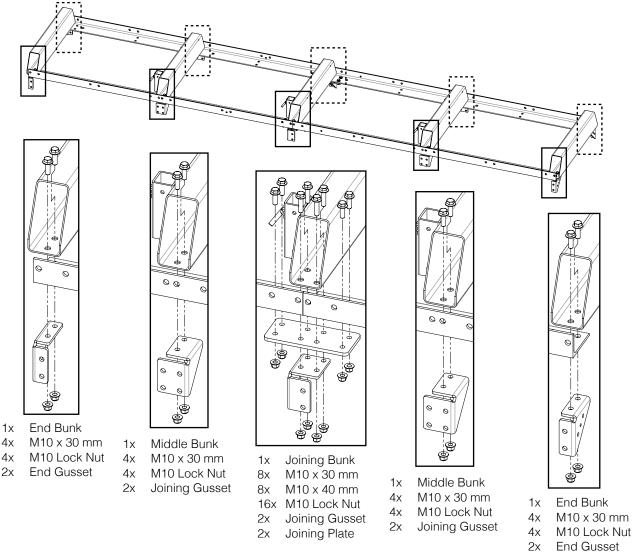

Track components listed in these tables are *not* included with the trailer package, namely track rails, joining plates, bunks, and carriage stops. These components are found in the sawmill crate. If the trailer was purchased for an existing sawmill (i.e. the sawmill is currently assembled), the track will need to be disassembled prior to building the trailer and the following assembly instructions performed.

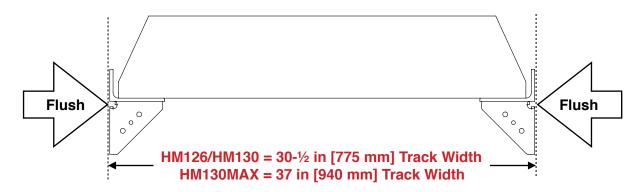

Use the fasteners included with the sawmill trailer to assemble the track. The fasteners included with the sawmill track will *not* be used.

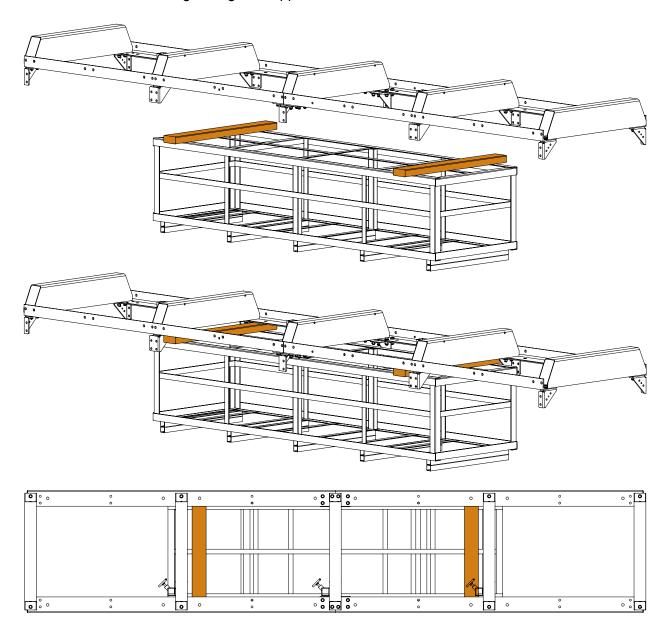

The above steps need to be completed on both left and right sides of the track. Make sure the gussets are flush with the outside face of the track rails as shown below.

#### 4. SIDE PLATES

Using the shipping crate as an assembly aid, lay two (2) 2X4s across the top the crate near each end. Position the track/gusset assembly on the 2X4s, ensuring it is centred end-to-end. The 2X4s need to be long enough to support the track rails but shorter than the track is wide.

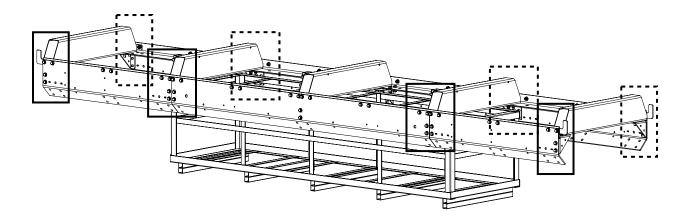

For either the HM126 or HM130, use 30 in [762 mm] long 2X4s. Use 36 in [914 mm] long 2X4s for the HM130MAX.

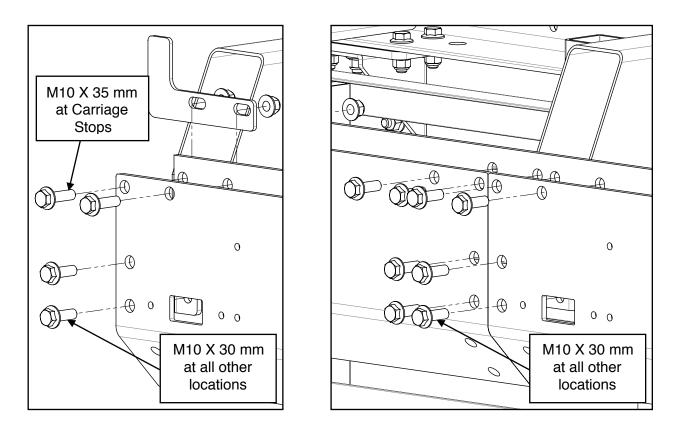

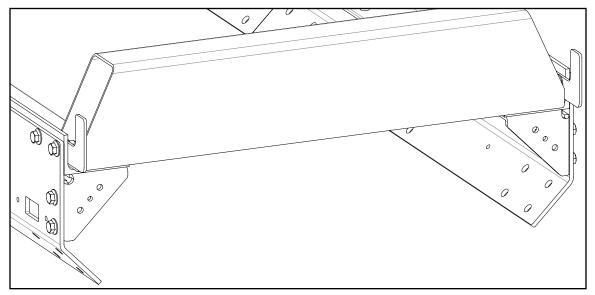

Using the hardware listed below, hang the side plates using the M10 X 30 mm and M10 X 35 mm bolts. Do not tighten these bolts. The eight (8) M10 X 35 mm bolts are used with the carriage stops. The M10 X 30 mm bolts are used everywhere else.

68x	M10 X 30 mm Flanged Hex Bolt	2:	x	Long Side Plate	
8x	M10 X 35 mm Flanged Hex Bolt	43	x	Short Side Plate	
76x	M10 Flanged Lock Nut	42	x	Carriage Stop	

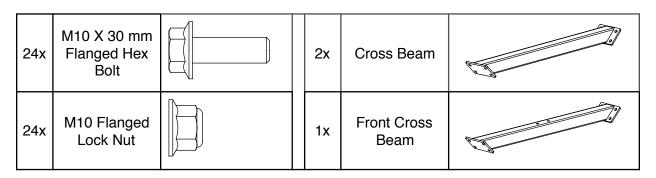

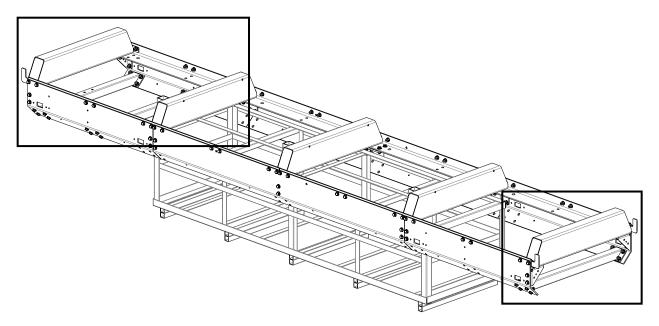

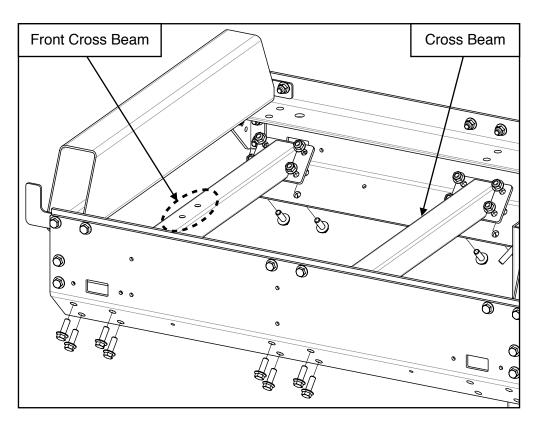

#### 5. FRONT AND REAR CROSS BEAMS

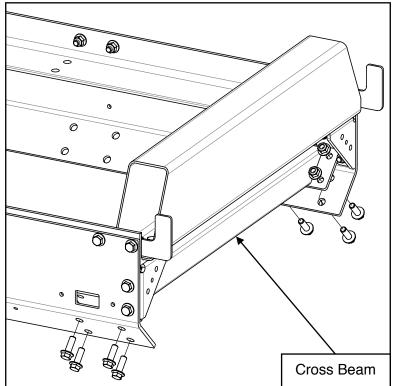

Using the hardware listed below, install the front and rear cross beams (2 front, 1 rear). Ensure the cross beam with the two holes is assembled at the front. Do not tighten these bolts.

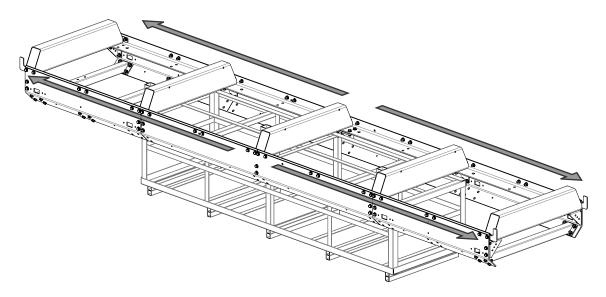

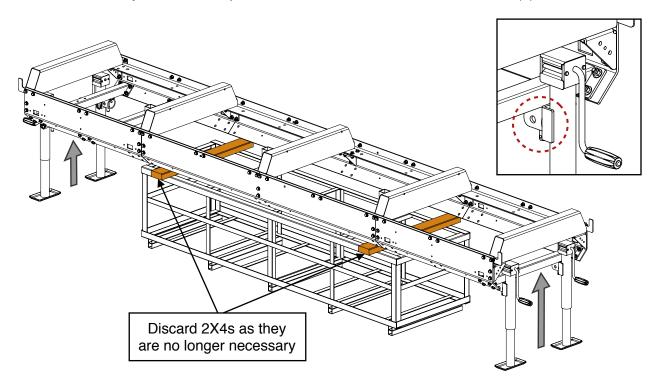

#### 6. BOLT TORQUING AND JACK STANDS

Torque all bolts per the table in section, **BOLT TORQUE SPECIFICATIONS**, starting from the centre and working towards the outer ends. Ensure the track is straight, level, and square during this procedure.

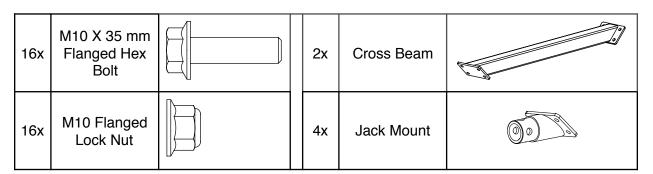

Position the jack stand receivers under the front and rear *cross beams* as shown below and raise the assembly until the side plates are above the crate. Discard the two (2) 2X4s.

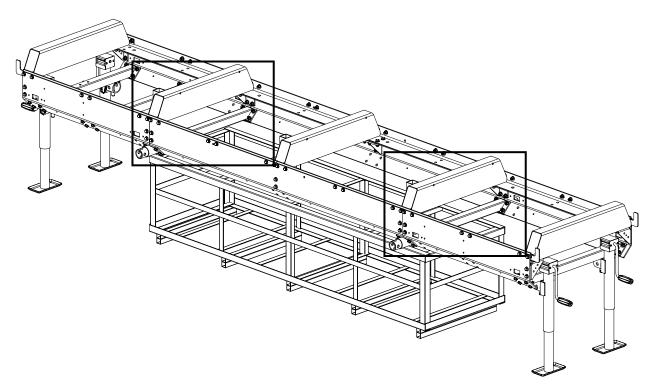

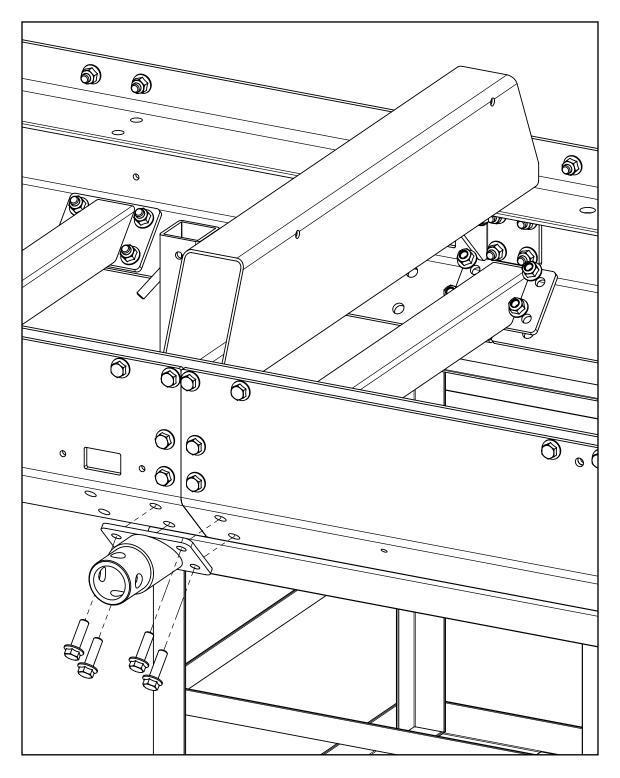

#### 7. INNER CROSS BEAMS AND JACK MOUNTS

Using the hardware listed below, install the 2 remaining cross beams and 4 jack mounts. Torque all the bolts per the table in section *BOLT TORQUE SPECIFICATIONS*.

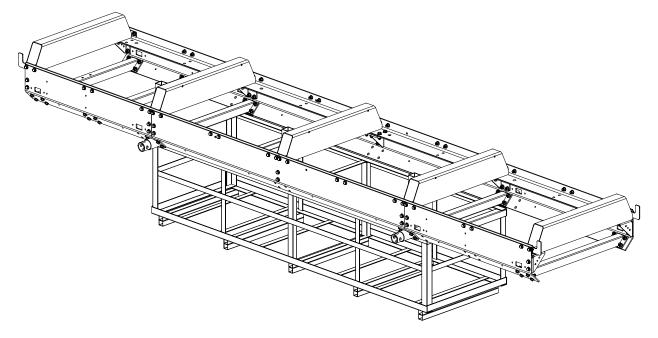

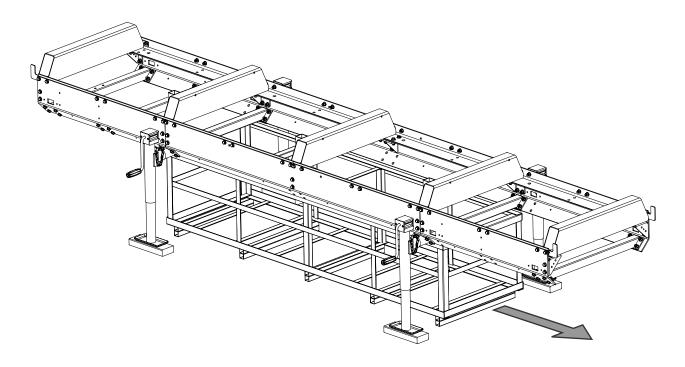

Next, lower the trailer until the cross beams are resting on the crate.

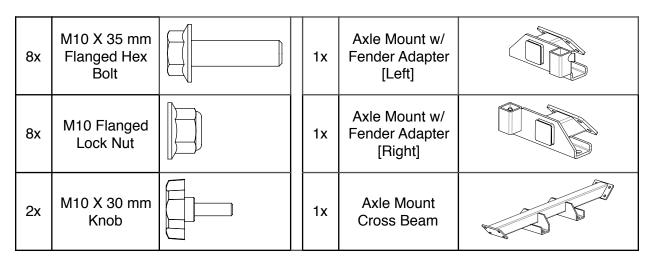

Slide the jacks onto the jack mounts and secure them with the locking pins. Raise the jacks up to slide the crate out from under the trailer assembly. Place blocks of wood underneath each jack if necessary to achieve the required clearance.

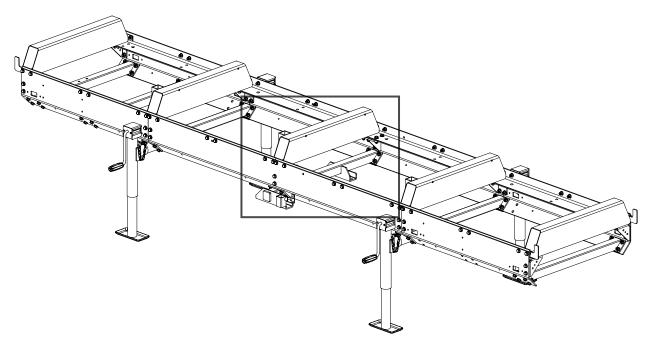

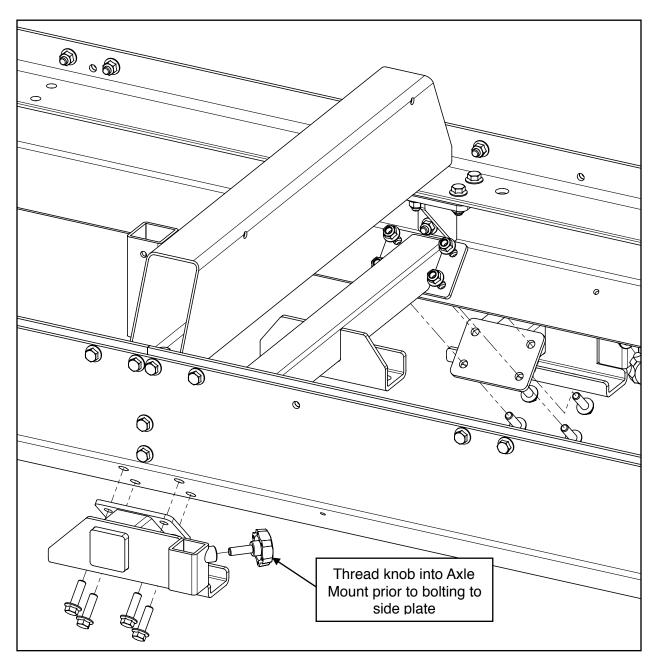

#### 8. AXLE MOUNTS AND AXLE CROSS BEAM

Using the hardware listed below, install the axle mount cross beam and left/right axle mounts with fender adapter as shown. Tighten these bolts.

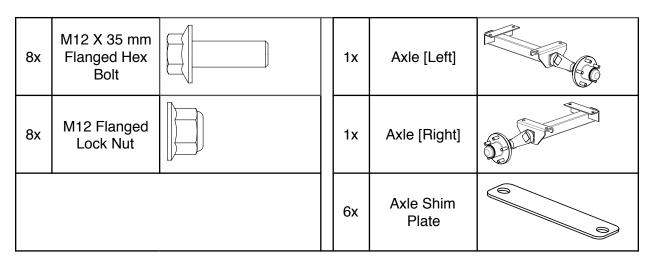

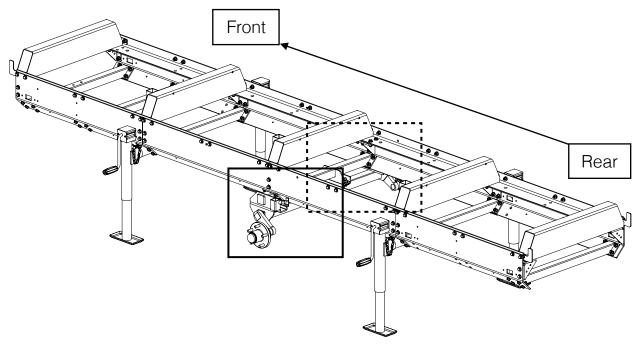

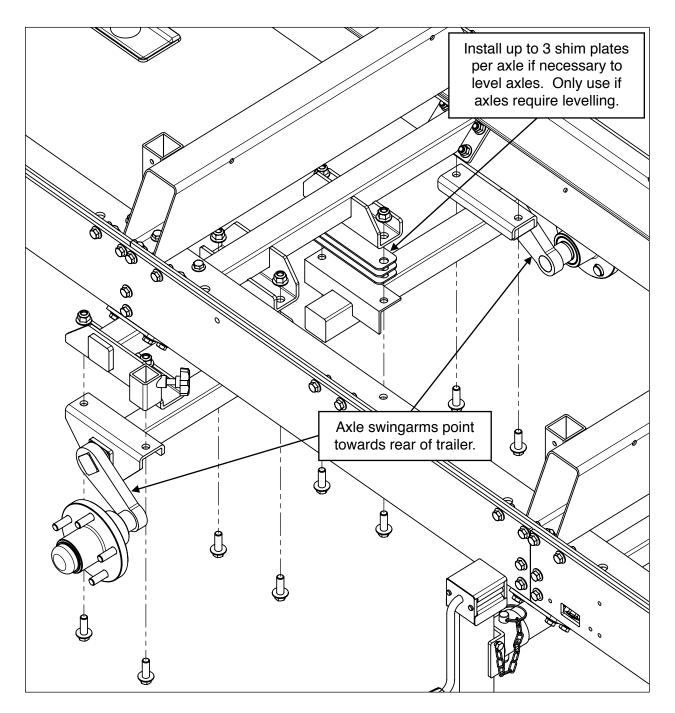

#### 9. AXLES

Using the hardware listed below, install the axles as shown on the next page. Tighten these bolts to the *specified torque*. Place a bubble level across both axles and check for level. If the level is off, use axle shim plates between the inner axle mounting face and axle cross beam to ensure the axles ride level. The shims are not necessary if the axles sit level after assembly.

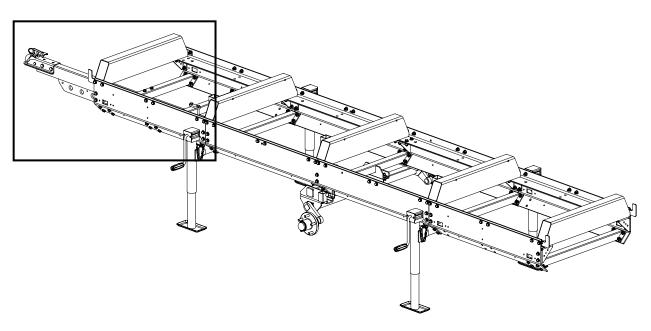

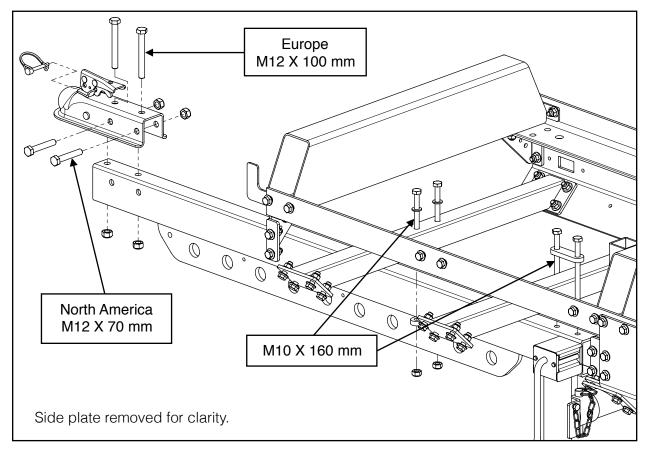

#### **10. TONGUE AND COUPLER**

Using the hardware listed below, install the trailer tongue and hitch coupler. Don't tighten the M10 X 160 mm bolts in this step since the plug for the lights will be routed through the tongue in the following step. Tighten the coupler bolts.

2x	M12 X 100 mm Hex Bolt <b>(Europe Only)</b>	
2x	M12 X 70 mm Hex Bolt <b>(North America)</b>	
2x	M12 Lock Nut	
4x	M10 X 160 mm Hex Bolt	
4x	M10 Flat Washer	
4x	M10 Lock Nut	
1x	Tongue	
1x	Hitch Coupler	
2x	Tongue Bracket	
1x	Locking Pin	

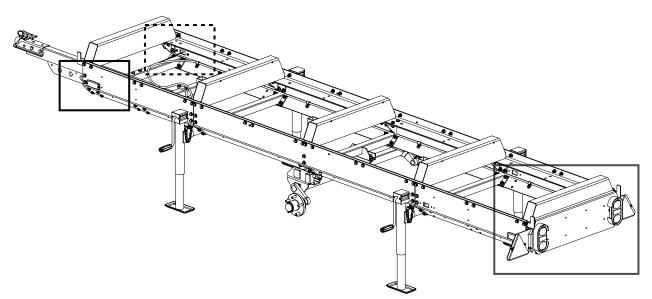

#### 11. LIGHTING

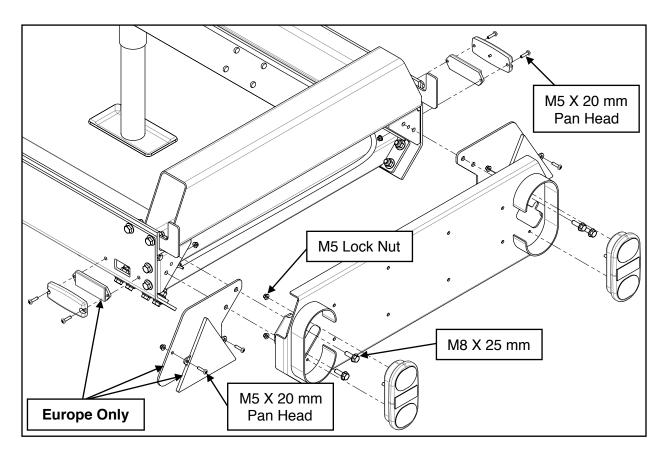

Using the hardware listed below, install the light bar and country appropriate wire harness. Secure tail lights to the light bar using M5 flanged lock nuts before mounting light bar to trailer. Use cable clamps to secure wire harness to side plates down right-side of trailer. Tighten all bolts. The M10 X 160 mm tongue bolts from the previous step can now be tightened after wiring has been routed through the tongue.

On the European version, install the 4 side reflectors, 2 front reflectors, and 2 rear reflector brackets and reflectors as shown on the following pages. There are no red/amber side lights on the European wire harness like the ones included with the North American version.

4x	M8 X 25 mm Flanged Hex Bolt		1x	Light Bar	
4x	M8 Flanged Lock Nut		2x	Rear Reflector Bracket <b>(Europe Only)</b>	· · ·
8x	M6 X 20 mm Hex Bolt		2x	Rear Reflector (Europe Only)	
8x	M6 Flat Washer	$\bigcirc$	4x	Side Reflector (Europe Only)	
8x	M6 Lock Nut		2x	Front Reflector (Europe Only)	
12x	M5 X 20 mm Pan Head Screw <b>(4x Europe Only)</b>		8x	Cable Clamp	
12x	M5 Flanged Lock Nut <b>(4x Europe Only)</b>		1x	Wire Harness (North America Only)	e e e e e e e e e e e e e e e e e e e
			1x	Wire Harness <b>(Europe Only)</b>	

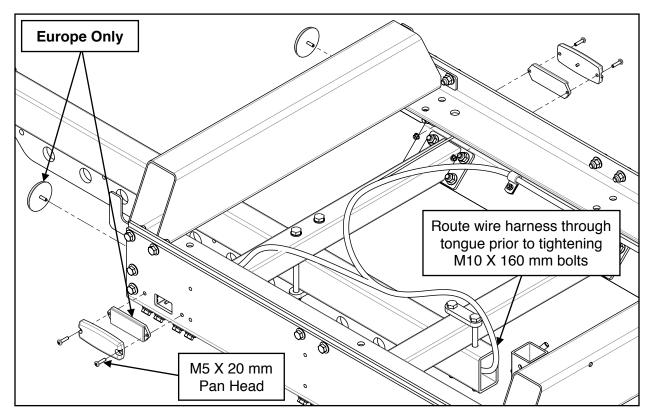

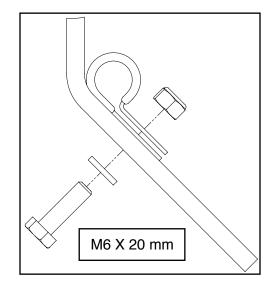

Note: Tail lights (North America and Europe) and side lights (North America only) are integral to the wire harness. They are shown exploded for assembly clarity.

WDLR-MY2020: Rev A

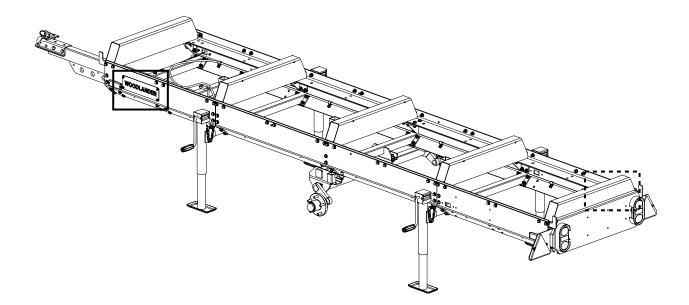

There are 2 cable clamps per short side plate (2) and 4 per long side plate (1) for a total of 8. Cable clamps are installed down the right-hand side of the trailer only. Use the M6 X 20 mm hex bolts, M6 washers, and M6 lock nuts as shown. This applies to both North American and European models.

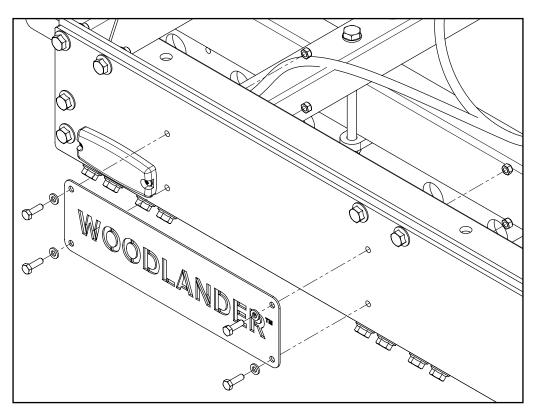

#### 12. BADGES

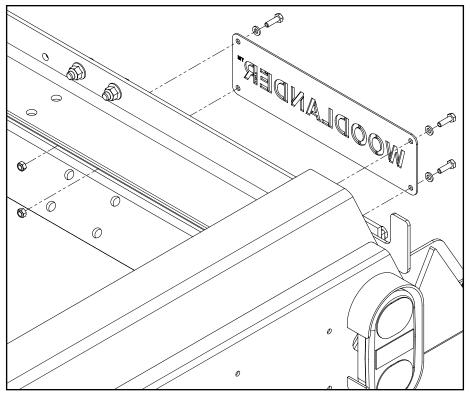

Using the hardware listed below, install the two (2) Woodlander badges as shown.

8x	M6 X 20 mm Hex Bolt		2x	Woodlander Badge	(WOODLANDER)
8x	M6 Flat Washer	$\bigcirc$			
8x	M6 Lock Nut				

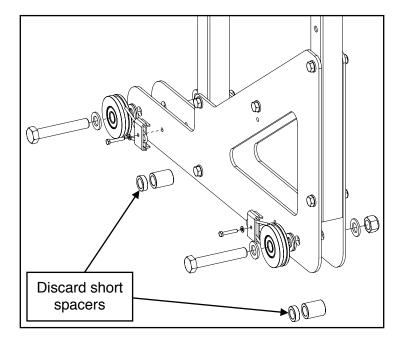

#### **13. HEAD LOCK-DOWN PLATES**

Place the assembled sawhead on the trailer. Using the hardware listed below, install the head lock down plates as shown on the next page. Tighten these bolts to the *specified torque*.

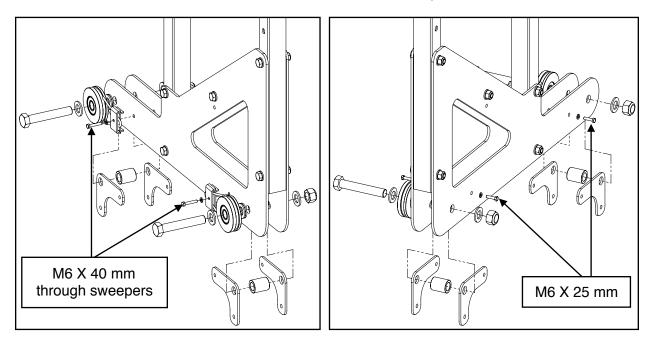

4x	M6 X 40 mm Hex Bolt	
4x	M6 X 25 mm Hex Bolt	
16x	M6 Flat Washer	$\bigcirc$
8x	M6 Lock Nut	
4x	Lock-Down Pin	
4x	Linch Pin	
8x	Head Lock- Down Plate	000
1x	3/8" Drill Bit	

Remove the eight (8) spacers from the carriage wheel axles and discard the four (4) short spacers. Only the four (4) tall spacers will be reused in the next steps.

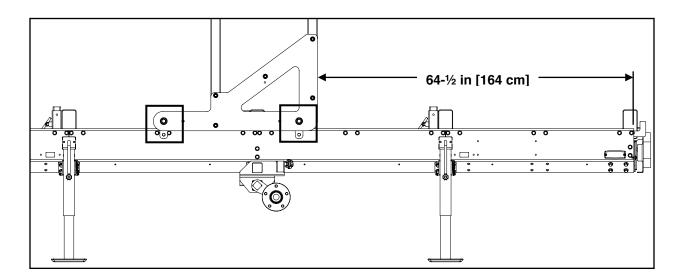

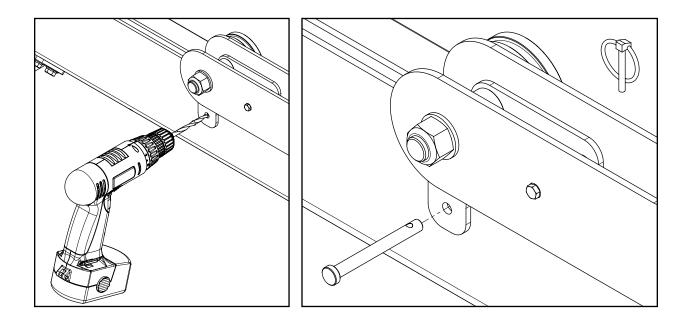

Using the provided M6 X 40 mm and M6 X 25 mm bolts, install the lock-down plates in place of the short spacers with the taller spacer sandwiched between. Reuse the four (4) M6 flat washers from the wheel sweepers on the sawmill when replacing the bolts.

Drill four (4) holes for the lock-down plates using the provided  $\frac{3}{8}$  in drill bit. Measure 64- $\frac{1}{2}$  in [164 cm] from the rear edge of the track rail (*not* the carriage stop) to the rear post of the sawhead. Insert a locking pin into each hole as they are drilled. Secure each locking pin with a linch pin.

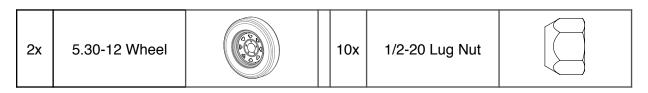

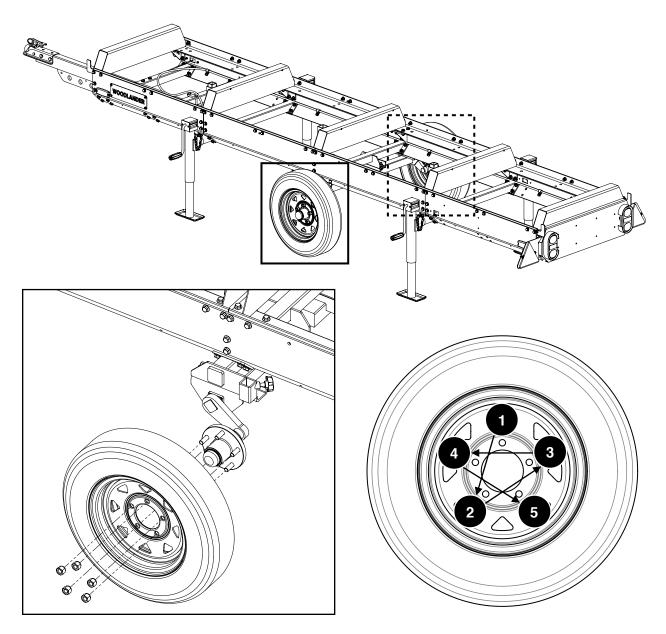

#### 14. WHEELS

Using the hardware listed below, install the tires on the axles. Using a torque wrench, torque the lug nuts to 80 ft·lb / 110 N·m following the pattern shown below.

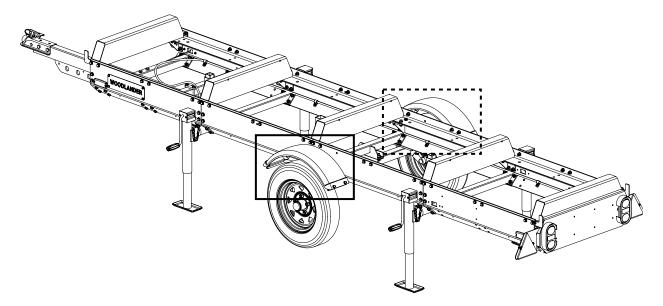

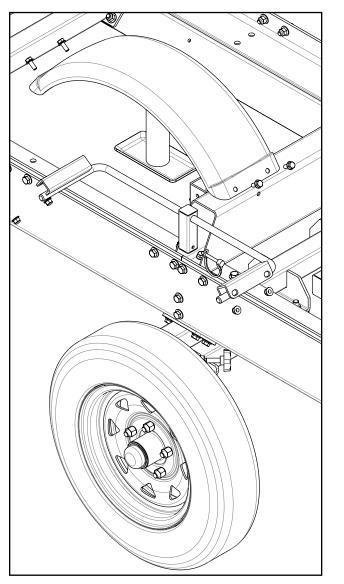

#### 15. FENDERS

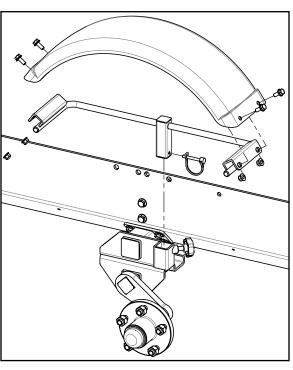

Using the hardware listed below, assemble the fenders to the fender brackets. Tighten these bolts. Slide the post on the fender bracket into the sleeve on the axle mount and insert the locking pin through the hole located at the bottom of the fender bracket post. Secure the fender/ fender bracket sub-assembly by tightening the two (2) M10 X 30 mm knobs.

8x	M8 X 20 mm Flanged Hex Bolt	2x	Fender Bracket	2 Contraction of the second se
8x	M8 Flanged Lock Nut	2x	Fender	
		2x	Locking Pin	

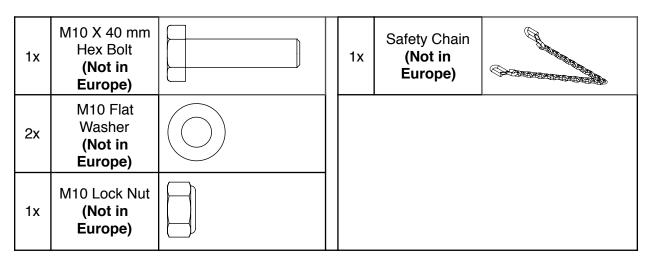

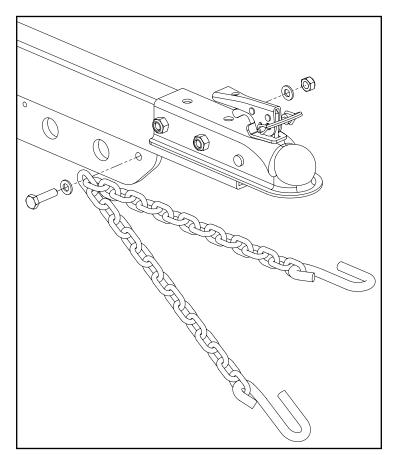

Some components removed for clarity

### 16. SAFETY CHAIN

Using the hardware below, install the safety chain on the trailer tongue. This step is not needed for European customers.
